Personal Investment and First Revenue

As you know, the marketing plan of the project allows you to make investments from \$15 up to \$1,000,000!

The project lets you get 3% profit per day. Do the math - think of the income you're willing to have and base your business with Lara on your calculations.

Do you want to have an extra income of \$900 per month? Invest \$1,000 in the project and withdraw your daily income, which will equal \$900 per month.

For this purpose it is necessary to know the marketing plan (payment plan) of the project, in order to incarnate your goals according to it. This is especially important when creating a big team, if you want to receive referral bonuses.

No one has the right to recommend others to do what he doesn't do himself. And people always feel it. Therefore, in order to create an effective team of investors, you need to be an investor yourself! In this case, it is always easier to tell and convince the person to join your team.
